

We got your Retail Management needs fully covered

Why LS Retail Software Solutions?

- **Unified commerce software solutions**

Manage your business centrally from front to back with one single software system

- **Seamless customer experiences anytime, anywhere**

Give your customers an outstanding shopping experience across all your sales channels and ensure their loyalty

- **Innovative technology and meaningful data**

Get innovative business software that will help you meet and anticipate fast-changing consumer habits.

- **Designed for your business**

high-quality, cost-effective and highly configurable software solutions help retailers, hospitality and forecourt businesses worldwide.

Your business will thrive with LS Retail

LS Central

Built on Microsoft Dynamics 365 . All data is collected in one central place, so you can track sales, stock and productivity in real time, in all your locations, from the back office.

LS One

LS One is a light, quick-to-learn and easy-to-customize retail POS software. Fast to implement and easy-to-use.

LS Hospitality

Gives you a clear overview over your whole operation, while facilitating communication in the restaurant. Send orders directly from the POS to the kitchen, speed up table turns, create menus centrally, decrease waste and operational costs, and delight your guests, again and again.
